Raw data of Figure 3B: The Nitrotyrosine level of hOBs under different exposure strategies of CSE and MBE (Area under curve). On Day 4 and Day 7, Pre-incubation group had the same exposure condition as MBE group and Post-incubation group had the same exposure condition as CSE group, so only 4 groups are shown on Day 4 and Day 7.

**Raw data of Figure 4A, 5A, 5B and 5C: PCR measurements of Nrf2, SOD2, CAT and GPX**

**Nrf2**
