Figure 1: Immunoblotting images of expression of p-PERK, PERK, ATF6, CHOP, and β-actin proteins in three independent tests

NC: normal control; OGD: oxygen and glucose deprivation (4 h); OGD-SN: oxygen and glucose deprivation (4 h) co-treated with SN (100 µm); SN: sodium nitrite (100 µm) treated
Figure 1 (cont.): Immunoblotting images of expression of p-PERK, PERK, ATF6, CHOP, and β-actin proteins in three independent tests.
